Offer

Obkov - gas spring production

OBKOV, founded in 1975, is a company specialized in the production of gas springs.

OBKOV produces a wide range of gas springs which can be applied in: the automobile industry, the production of buses, caravans, tractors, fork-lifts as well as in the additional equipment of various vehicles, the furniture industry, the production of various technical devices, etc.

Beside the standard production programme we also produce gas springs of special dimensions required by a customer. Our knowledge and experience can help our customers find the optimum solution concerning the application of gas springs.

In order to appropriately meet the more and more demanding requirements of the market we focus not only on the quality of gas springs but also on the development of new products and technologies. Our aim is to satisfy all the needs of our customers, so we are open for their suggestions and wishes.

Keywords: gas spring distribution sales representative
