Description

Professional translation company experienced in localizing for a wide range of manufacturing industries and a highly competent team of specialized experts, we help companies from various industries and institutions to overcome language and cultural barriers and enable their fast and efficient multilingual communication with the target market.

Technical Localization

Technical localization is the process of linguistic, cultural, technical and legal adaption of internationalized technical or IT content such as software, technical documentation, user manuals or technical correspondence to the requirements of a specific locale or target market.

Localizable technical or IT-related items include:

- Large-scale enterprise systems
- PC and Mac applications
- iPhone, iPad, Android and Windows Mobile apps
- Technical software
- Technical documentation
- User manuals and machine and software UI
