Description

We are Osti Jarej, a company that produces bronze gardening tools of highest quality made of solid copper alloy. We come from Slovenia (EU) and all our products are made in Slovenia: wooden parts from the best Slovenian wood that is traditionally processed according to demanding sustainable standards. Copper Gardening Tools Osti Jarej are indispensable for biodynamical and agro-homeopathic cultivation of soil, its positive results and impact on the earth make it vital for every organic and sustainably oriented grower. All products have a life-long warranty on metal parts.

AGRICULTURAL INDUSTRY

Offer

Osti Jarej bronze - garden tools made from solid copper alloy.

Positive effects of using copper tools:

they raise the resistance of plants

increase life potential

enrich the earth with rare elements

prevent an infection of plants

repel slugs and snails

alkalize the substrate

enable development of cell membranes in plants

bronze tools are long-lasting

tools are non-sparking and are not static

they do not rust

have a low friction coefficient

ionize surface water

Cooperation Offered

1. Sales / Distribution
