Description

ZFW HORTISERVICE Kft was founded in January 2010, main activity is **organic farming** and **distribution of innovative agricultural and horticultural input materials**, located in KECSKEMÉT, Hungary. The company is specialized on:

1. Distribution of locally selected vegetable seeds,
2. ECO friendly organic fertilizers,
3. Biological control
4. BIO certified organic farming.

Our main products consist of professional vegetable varieties, solid and liquid organic and organo-mineral fertilizers, beneficial living organisms. We successfully set up and **offer competitive AMINORET® zero residue technologies** including **creative agronomical growing solutions** for protected and non-protected crops.

Highest priority is to restore natural balance in soils and increase fertility.

With the supportive activity of BIOSTIMULANTS and MICROBIALS (beneficial fungi's and microbiological agents) we are confident of consumer's

- * food safety,
- * functionality,
- * better taste,
- * higher content of vitamins compared to conventionally produced vegetables, that based on synthetic chemicals and chemical fertilizers.

Functionality of innovative **AMINORET® zero residue technologies** are regularly tested in our own KISÉRLETI KERT trial station in close collaboration with universities, institutes and crop advisors.

We believe that our efforts are effectively serving both the nature and the protection of human health.
